The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 & 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor in view of Sivonen et al.

The relevance of Taylor to the claims has been explained in the previous Office action; the amendments made to the claims add a limitation to the preamble of each independent claim preventing the load 24 of Taylor from being read as the claimed resistive element as it must now be read as the load. Thus the difference between the claims and Taylor is now the resistive element claimed. However, it is known from Sivonen et al. to incorporate such a resistive element in the output circuit of an RF amplifier. For instance, fig. 3B of Sivonen et al. shows a resistor  $R_p$  in parallel with an LC tank circuit so as to lower the Q of the circuit. This will result in a lower impedance at the output at the operating frequency; see col. 3, lines 21-40 of Sivonen et al. It would have been obvious to use such a shunt resistor across the inductor L3 or capacitor C4 of Taylor in order to broaden the operating frequency range.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor in view of Midya et al. in further view of Sivonen et al.

The relevance of Taylor in view of Midya et al. to this claim has already been explained in the previous Office action except for the new limitation added which is obviated by Sivonen et al. by the same reasoning as claims 1-8 & 10-15 above.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
